

## e-Learning for Otolaryngology Head & Neck Surgery

A free and highly interactive self-directed e-learning initiative which supports and enhances the training of Otolaryngologists.

e-lefENT will help to improve ENT knowledge, clinical and surgical skills among ENT trainees and ultimately ensure the delivery of safe patient care.

The e-learning sessions will reflect the syllabus set by the Royal Colleges' Intercollegiate Speciality Surgical Curriculum Project (ICSP) and support the implementation of the standards of the Royal College of Surgeons.

For more information visit
