

Speaker Honoraria Report

I would like to express my thanks to you, Nick, and everyone that helped me travel to and get around England. I had such a special time at the conference and also at the hospital I visited. I appreciated the chance to meet other ENT doctors, audiologists, and speech therapists who are interested in global health. I had many productive conversations with people interested in working together with me to improve the skills of myself and my colleagues in Cambodia.

The opportunity to visit the Queen Elizabeth Hospital and the Brighton and Sussex University Hospital NHS Trust were very educational for me. Drs. Mahmood Bhutta and Charlie Huins looked after me so well and were so warm to me during my visit. During observation at the hospital, I learned about the working systems, and the practices of sharing information with the patients and operating field of hearing implants. I am so happy I had this opportunity and I will bring this knowledge to my department at home. Even though I come from an NGO hospital in a developing country with few resources, I understand how to improve medicine in my setting. While some of the technology I saw in the UK is not available in Cambodia, I believe my country will have more similarities with the UK in the future. I will begin to build the structure from today.

To me, England is so wild. The houses are so close to each other in Brighton. I met many people from all different countries, they all spoke English so well. I am so impressed with the people there. Everyone gets good health care, and everyone is treated the same. In my heart I know when I return home I have lots of work to do. I wish to make the best care for my nation and I will provide my patient with good care and the right treatment like I witnessed in the UK. I also wish to come back to England again. Thank you very much again for having me here, without this opportunity I don't think I can see this world.
